

OTG AND NFR

Understanding Unicity On The Ground (OTG) and Not For Resale (NFR) Products.

Understanding Unicity On The Ground (OTG) and Not for Resale (NFR) Products.

WHAT IS OTG AND NFR?

OTG (ON THE GROUND)

OTG refers to an “on the ground” product purchase, this usually means that the product has been reviewed and registered locally for compliance and is available in local currency with local taxes applied. This also means that the product can be sold by Unicity Distributors to their customers.

NFR (NOT FOR RESALE)

NFR refers to “not for resale”, This means the product is intended for personal consumption only by the purchaser of the product and cannot be resold after purchasing. Where a product is identified as “NFR”, distributors and customers are allowed to purchase directly from Unicity up to *five boxes per product item each month.

WHY WE USE THESE TERMS:

Regulators have created these terms to help categorise how products are sold and for what purpose. Unicity uses these terms to help our distributors and customers understand the status of a specific product in a certain country. So, whether you’re building an international business or simply sharing products with friends and family you can have confidence that Unicity complies with local and International laws, customs and regulations.

*Unicity may occasionally decide to change the quantity of NFR products a distributor or customer can buy.
